ASX RELEASE / MEDIA RELEASE

## Drilling commences

- Drilling has commenced at the Wapiti East Project
- Initially, 2,000 to 2,500 metres of drilling planned
- Expected completion in early October

Fertoz Limited (ASX: FTZ) is pleased to announce the commencement of its 2013 phosphate drill programme at its wholly owned Wapiti East Project in British Columbia, Canada.

Drilling commenced on Friday 30 August and is expected to continue until early October. Assay results are expected to be received during the campaign and Fertoz will update the market during the course of the programme.

Fertoz is planning to drill between 2,000 and 2,500 metres.

Drilling will target previously drilled high-grade phosphate horizons and test new areas identified by mapping, trench and soil sampling.

Trench sampling has identified undrilled horizons grading over 30% P<sub>2</sub>O<sub>5</sub> over a minimum of one metre widths.

**Wapiti East drill rig and core for the first drill hole (DDH01) of the campaign.**

Les Szonyi, Managing Director, said: *“We are very pleased to begin drilling so quickly on the first of our Canadian projects and we look forward to updating the market once drilling is complete. We are currently preparing plans for drilling on our other Canadian projects as well. It is an exciting time for the Company and I would like to thank all those people who have supported and helped us to reach this milestone.”*

## **About Fertoz**

Fertoz is exploring for high grade phosphate resources in Canada, which has one of the largest agricultural economies in the world and which begins importing phosphate later in 2013 to meet domestic demand. Fertoz has four projects in Canada – Wapiti (East and West), Barnes Lake and Crows Nest – all proximate to infrastructure. Fertoz is targeting small, high grade resources that can be commercialised quickly and inexpensively.
